R. 20. E., M.D.B.&M. Containing 2784 acres more or less.

APPENDAGE NO. 2 (Item No. 12)

The water applied for in this application is to be used upon the lands as shown on the accompanying map to supplement the present available supply.

At the present time an insufficient supply of water is obtained from Brown Creek, Steamboat Creek, Washoe Lake, and some drain and waste. These sources are so unreliable, and the flow so variable, that much of the land has ceased to be cultivated.

The ditch extensions and other pertinent structures and their locations are shown tentatively as Mr. Damonte is not anxious to go to the extra expense until such time as he is assured of the approval of these transfers.
